

Welcome to The Carol Milgard Breast Center!

As part of one health care community, the Franciscan Health System and MultiCare Health System joined together to establish the Carol Milgard Breast Center with the singular focus to provide excellence in breast screening and diagnosis. We are very excited about this joint venture and what it will do for our entire region. Working together, we believe we have established a model for health care leadership and service that will serve our community for decades. Each individual and organization involved has invested an incredible amount of good will around the table as we came together in this collaboration with TRA Medical Imaging. All of us who are partnering on this project agree it is crucial that South Sound residents have local access to first-class breast health care. We feel strongly that we are making an investment in this community for the sake of our daughters, granddaughters and great granddaughters.

As a community of health care, this model of collaboration is a legacy we can all be proud of today and into the future. On behalf of both our organizations, we'd like to thank our patients, our staff, and the Gary E. Milgard Family Foundation, who have made this endeavor possible. Thank you for your inspiration to dream of the lives we have yet to touch.

Sincerely yours,
